William A. L. Mitchell Endowed Lecture

This memorial lecture is presented annually to honor the life of William A. L. Mitchell, who died in 2005 from severe traumatic injuries sustained in a car crash. Following his treatment at the USA Trauma Center— in appreciation for the care he received— his family established the endowment and the lecture series both to memorialize William and to improve trauma patient care in our region through education. William was a senior at UMS Wright Preparatory School at the time of his death. The William A. L. Mitchell Lecture has served as a platform to educate and convey trauma awareness to healthcare providers and residents of the Mobile area. Car crashes are one of the leading causes of death among young people. According to the National Highway Safety and Traffic Administration, education has helped decrease the number of fatalities among teenagers.

Target Audience

Learning Objectives

At the completion of this symposium participants will:
• Have an increased knowledge of resuscitation of trauma victims;
• Be informed about acute general surgery emergencies;
• Increase their awareness of challenges in under developed countries;
• Have an understanding of new critical care processes and techniques;
• Understand the priority of trauma care in military settings; and
• Learn new developments in head, neck & thoracic trauma.

Things to do

Beaches
Mobile Medical Museum, Carnival Museum, Art Museum, History Museum, Battleship Memorial Park, Gulf Coast Exploreum Science Center, Fort Conde, Deep Sea Fishing, Golf Bottom Dolphin Tours, Alligator Alley, Dauphin Island Sea Lab, Robert Trent Jones Golf Course

**Please state if you need special assistance or have dietary needs. If you are in need of a special accommodation, please submit a description of your needs in writing to receive service.**
